

Control panel

Cache management

When you create a new zone, you can activate the option of caching files in CDN network for a limited time only. To enable this option login to my.ucdn.com. Next

click on "My Zones" from the menu on the left side

Check the box in front of "Cache my files in CDN network for a limited time only" and specify the desired time for caching in fields "Cache expire time".

Cache my files in CDN network for a limited time only ?

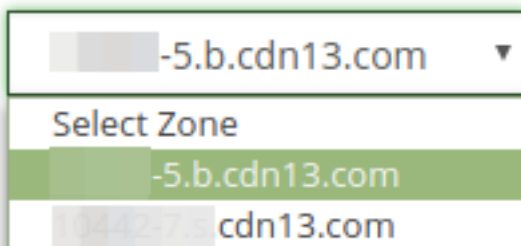

If you want expire time smaller than 1h please contact our [support team](#)

Cache expire time:

Also you can reuse the cache from a different zone that has the same files. This means that the files that are already cached on our servers will be used also for the new zone. To enable reusing cache, check the box next to "Reuse cache from one of my other zones".

Reuse cache from one of my other zones ?

Select zone's cache to reuse

A dropdown menu for selecting a zone's cache to reuse. The current selection is "-5.b.cdn13.com". The dropdown is open, showing a list of options: "Select Zone", "-5.b.cdn13.com", and "134275 cdn13.com".

-5.b.cdn13.com
Select Zone
-5.b.cdn13.com
134275 cdn13.com

To save the activated settings using the button "Save Changes".
