

Storage

Storage Upload

UCDN uses OpenStack Swift technology for storage purposes. You can check for more information here: [Openstack's Swift](#)

You can acquire your login details for the specific container by:

- Go to the  page in your control panel
- By clicking on the button  that is located in front of the storage you need
- There you can check your FTP details.

FTP Europe Login Information ✕

Password

When selecting a button, you can check the storage synchronization between two regions - Europe and North America. If is synchronization enabled, you will see a checkmark in front of two or one region, as shown below:

Storage

There are several ways which can be used as upload methods:

- [FTP](#)
- [Swiftclient](#)
- [rclone](#)
